

The project

InAction is an Erasmus+ project in the framework of Key Action 2 that was developed to promote Circular Economy practices and a zero-waste lifestyle to youth across Europe, encouraging them to take action towards environmental protection.

InAction is a transnational partnership between 3 organizations with a duration of 24 months, beginning in April 2023.

Aims

- ➡ Raise awareness of the **Problem of Waste** and its **Environmental Consequences**
- ➡ Promote **Youth's Adoption** of the **5 R's**: Refuse, Reuse, Reduce, Repurpose, and Recycle.
- ➡ Foster the **Good Practices and Policies**
- ➡ Encourage youth to develop **Greener** and more **Sustainable Environmental Solutions**

Target Groups

- ➡ Youth
- ➡ Youth Workers
- ➡ Professionals, Educators, and organizations working on Circular Economy

1st Result: InAction Resources

Within the scope of the project's 1st Result, the partners have conducted a survey among 120 youths to determine their level of understanding of the zero-waste concept. In addition, they have compiled a joint report on best practises for a zero-waste lifestyle, which includes best practises implemented, evaluated, and validated within the partner organizations. These documents not only promote a zero-waste lifestyle, but they also set the groundwork for the upcoming tasks.

Kick-off Meeting

The InAction project partners conducted their first transnational meeting to coordinate project activities on July 4, 2023, in Wroclaw, Poland. During the meeting, they were able determine their respective duties and create a distinct work schedule. In addition, they discussed the survey's findings and planned their next steps, accordingly, addressing various management concerns for the successful implementation of the project.

Why Zero-Waste?

A zero-waste lifestyle not only conserves the environment by reducing waste and minimizing its impact, but also instills essential principles of resource management and sustainable living. Educating young people about zero-waste practises increases their environmental consciousness and equips them with the knowledge and skills necessary to make informed decisions regarding consumption and waste production. In turn, we foster long-lasting behaviors and attitudes regarding sustainability, promote financial responsibility, and instill a sense of community engagement and global responsibility. Eventually, promoting a zero-waste lifestyle among young people contributes to a greener, healthier planet and cultivates the leaders and advocates necessary to effect positive change for future generations.

Next Steps...

2nd Result: InAction Learning Path

Soon the partners will start working on a Guide to Zero-Waste Lifestyle, which will include both theoretical modules and a set of ready-to-use learning materials.
