

STANDO LTD, Cyprus – Recycling

Recycling and Preventing Waste

We house recycling bins for paper and plastic disposal in our offices. We have a kitchenette, glass utensils and water dispenser to avoid using paper or plastic. In our trainings and all activities, we encourage use of non-plastic items and refill bottles and similar, either for personal use or as training materials.

How does it work?

We give importance to environmental matters and waste reduction as an organization. And for this we implement and encourage simple and achievable methods as described above.

- 1- using recycling bins
- 2- using water dispenser and a non-plastic refill bottle
- 3- prefer glass mugs to plastic or paper mugs

How can you participate?

These basic practices can be established at each workplace, and staff members can be encouraged to adapt to them easily. You can encourage your colleagues to bring non-plastic water bottles to work.

Fun fact

It is fun to carry a non-plastic refill bottle around, and much healthier indeed. It also feels cosy to be able to use a kitchenette at work and some glass utensils, whenever available. Preference always goes in the order of glass cups, paper cups and plastic cups, plastic cups being the last in the row.

Why is it important?

We can all follow some simple practices in our daily lives and workplaces that can bring change.

Remember💡

We installed recycling bins, and we have a kitchenette and a water dispenser in our organisation. We can provide glass items to people on their visits for trainings, seminars, etc., and reduce the use of plastic or paper cups.

STANDO LTD, Cyprus – Print-friendly Options

Print-friendly Options

We go digital to avoid using or printing paper

How does it work?

At every stage of our work in our organization, we implement digital tools and applications and try to avoid printing paper as much as possible.

Fun fact

Going digital is also a good opportunity to enhance one's digital literacy skills.

Why is it important?

Going digital can save a lot of space and time for most of us, while at the same reducing our carbon print, and saving trees and the planet.

How can you participate?

As our staff members, you can also attend a training for various digital apps, programs and communication means in order to perform your daily tasks digitally and avoid using paper.

Remember

Print-friendly options are the most preferred method of working in our organization.

STANDO LTD, Cyprus – Projects & Courses

Fun fact

Attending or offering courses and engaging in projects raise awareness for a broad range of audience and become part of the lifelong learning process.

Why is it important?

In courses and projects, similar to workshops, knowledge becomes consolidated. People also realise and suggest solutions from their own experience. There is more room to find solutions that can find use in practicality.

Remember

Getting involved in projects and courses enhances lifelong learning and people involved both contribute and can become ambassadors of knowledge gained.

Environmental Practices mentioned in projects implemented & courses offered

Our organization participated in several environmental projects, which lay the foundation of and describe practices that can be implemented for environment, waste reduction and climate change.

How does it work?

List of **Erasmus KA2** projects we have been participating in:

UglyFruitsNOT! A Project that focuses on 'ugly' fruits and vegetables and aim to involve these 'ugly' looking but still edible food in the market chain for consumption. The project aims to prevent food waste for a sustainable environment and economy.

Green Urban Paths: focuses on green education and finding sustainable solutions for sustainable development of urban areas through digital tools. <https://www.greenurbanpaths.com/>

ClanIMATE youth: is a project that aims to empower youth to tackle climate change through use of digital tools such as animations. <https://clanimateyouths.netsons.org/>

Competences4ESD: is a project focusing on VET training and training of teachers to teach sustainability in their school communities for environment and fight against climate change. <https://mabarthele.wixsite.com/competences4esd>

Brainstorming and creative solutions are common in projects. In workshop-centered projects, participants become ambassadors and models for others.

How can you participate?

Our organization offers courses related to environment for raising awareness.

List of **Erasmus KA1** projects:

We offer **Art and Environment course**, that utilizes environmental concepts to perform artwork.

<https://standoutedu.com/art-and-environment/>

We offer a course about **Environmental & Outdoor Education** in Non-Formal Settings, aiming to raise awareness on issues that impact the environments and actions that can be taken to sustain it. <https://standoutedu.com/environmental-outdoor-education-in-non-formal-settings/>

You can visit our website and follow our social media to learn more about courses and contact us for registration. <https://standoutedu.com/>
